Discussion

Field screen samples from all four sides of the excavation boundary for both the CZ41-010 and CZ41-011 hotspots were below action levels and samples have been submitted for offsite analyses. The western, deeper excavation associated with CZ41-010 was immediately backfilled. The more shallow excavation of the eastern hotspot (CZ41-011) will be backfilled within the next few working days. Backfill was performed at risk pending the results of the offsite analyses. Additional excavation may be required based on the final results.
